

Test Case ID: 001 server loading req

-Does the server load resource when request is sent?

Expect bots to display below the "see all bots" button

Bug Report:

-Server failed to load resource: the server responded with a status of 400 (Bad Request)

Clicking on return all bots returns nothing

Bug report 2:

-When player gets one win one loss and it displayed as two wins instead of one win and one loss

-Only counting losses as part of the tally, not counting wins and losses correctly

Bug report 3:

Backend isn't returning anything for "see all bots"
